CROYDE KAYA BIRTH STOOL

Designed to support the most natural positioning during labour and delivery.

The Kaya Birth Stool helps to support the birthing person and aid positioning during labour.

The stool is completely waterproof and can be fully submerged in water.

It is suitable for use within birthing pools and its waterproof properties make it easy to be deep cleaned after use.

Weighing just 3.4kg, the stool is lightweight and easy to transfer around the room.

UNIQUE SHAPE FOR COMFORT

The stool's contoured ridge optimizes contact with the ischial tuberosities in the seated or supported squatting positions, leaving the birth canal unobstructed.

Integrated handles offer additional security for stability.

POSITIONING & BIRTH PARTNER ENGAGEMENT

The stool is highly versatile and supports a wide range of squatting, kneeling, rocking and lunging positions.

Birth partners can deliver comforting back massage while the woman leans on the stool. The contoured ridge is large enough for the birth partner to sit behind the woman.
