

GRACIELLA GYNAE EXAMINATION CHAIR

The Graciella® has been designed with attention to detail, taking into consideration the time-consuming work of gynaecologists.

The unique two column design enables easy positioning of the chair and increases the patient's trust before and during the examination.

The chair can be easily positioned with electronic adjustment of the backrest, hi-lo & trendelenburg tilt.

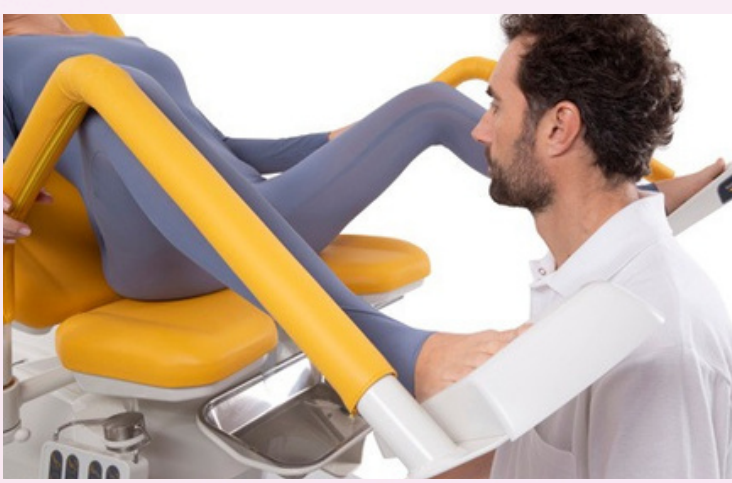

The pre-set entry and examination positions also co-ordinate multiple movements to quickly achieve optimum placement.

PRE-SET POSITIONING

The Graciella can be easily adjusted to achieve pre-defined examination and entry/exit positions.

Pressing one button co-ordinates multiple movements for examination and reverses them for exit afterwards.

FOOT PLATES

The unique foot plates enable comfortable and dignified leg positioning.

Optional goepel leg rests are available and are easily interchanged.

ADJUSTABILITY

The foot controller is easily accessible for the gynaecologist at the bottom of the chair and allows it to be adjusted quickly even during examination.

The same positioning options are also available via the integrated handset control which can be accessed from various angles thanks to a rotating mechanism. Perfect if the attending midwife needs to adjust the couch from the side.
