CROYDE MOOD TUBES

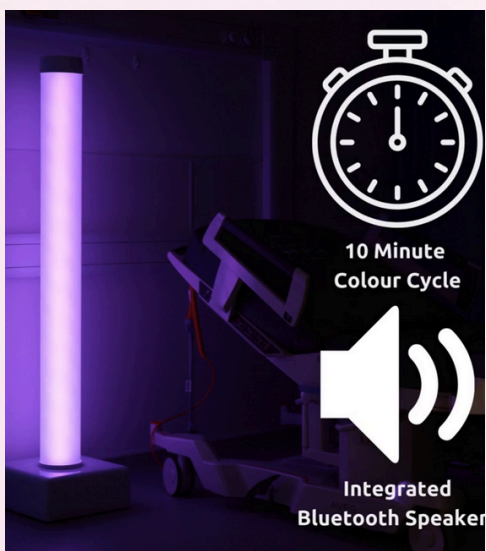

An LED light tube with an optional audio function to create a more ambient atmosphere in clinical settings.

The Croyde Mood Tube is a beam of light that helps to create a peaceful and soft environment with subtle colour changes.

The Audio Mood Tube also comes with built-in Bluetooth speakers, allowing birthing persons to listen to a calming audio of their choice.

Unlike standard off-the-shelf sensory light solutions that are designed to be stimulating, the Croyde Mood Tube is purposely designed for a softer, calmer lighting experience - ideal for use in maternity and neonatal environments.

10 MINUTE COLOUR CYCLE

The colour palette cycles through 11 colours on a 10-minute cycle.

As each colour shifts, the birthing individual is empowered to identify their contraction timings, increasing awareness of their labour progression.

BLUETOOTH SPEAKERS

The Audio Mood Tube has built-in Bluetooth speakers. This allows the birthing person to play an audio of their choice, further enhancing the relaxing atmosphere the tube creates and offering an aspect of control over their birthing environment.

NO MAINTENANCE

Unlike bubble tubes, the Mood Tube requires no maintenance. The PVC material means the tube can be wiped clean using hospital wipes, making it perfect for use in most clinical environments within the hospital.

CALMING & PEACEFUL

Using its LED light beam technology, the Audio Mood Tube automatically cycles through the colour spectrum to deliver a calmer, more relaxed room ambience. It helps to foster feelings of relaxation and wellness, whilst also being a welcome sensory distraction and focal point within the room.
