

CROYDE HEIGHT ADJUSTABLE BABY ASSESSMENT TABLES

The Croyde Height Adjustable Baby Assessment Tables allow clinicians to position the table at the perfect height for neonatal examinations.

The Croyde Height Adjustable Baby Assessment Tables are an ergonomic solution for neonatal examinations.

The height is easily adjusted, by compressing the foot pedal and lifting or lowering the table top, to ensure that staff can perform tasks at their ideal working height.

Both the standard and compact models are lightweight and easy to move between bed spaces, with brakes to secure in position.

ERGONOMIC & HEIGHT ADJUSTABLE

Depressing the foot pedal allows clinicians to position the table at the ideal working height, protecting them from physical stress and strain.

Baby examinations become instantly more comfortable and stress free.

The ultra-lo, low height position also makes the table accessible for wheelchair users. The table can also be used as an ergonomically friendly laptop platform for data entry.

STORAGE OPTIONS

This unit is available with either a storage cupboard with shelving or a drawer unit.

An additional surface can be pulled out of either side of the unit to provide extra workspace for papers, equipment or a laptop.

COMPACT OPTION

The Compact Baby Assessment table provides the same height adjustability with a more compact design.

This smaller footprint is the same as a regular bedside cot, meaning that this assessment table can be easily moved around smaller spaces for use in bays.
