CROYDE LED SKY CEILINGS

LED Sky Panel ceilings help to promote relaxation & wellness, reduce stress and anxiety; and improve the patient and staff experience in all areas of clinical settings.

Croyde LED Sky Panels look visually stunning in any room.

They are backlit and dimmable to help create the desired mood effect and are available in a wide range of images. Images can be chosen from our curated range, Shutterstock.com or an image supplied by you.

Designed to promote wellness & relaxation, they bring a sense of warmth & calmness to any room.

CLINICAL AREAS

The high-quality, backlit images create beautiful arrays in clinical areas to make for a softer feel and put patients at ease. Not only do the panels look great, they help to relax the patient and create a sense of calm in any clinical space.

HIGH RESOLUTION IMAGERY

Our LED Sky Ceiling panels are strikingly realistic.

We use carefully selected, high-resolution imagery to create realistic sky scenes, printed using specialist UV-pigmented ink to ensure colour tones stand the test of time.

STAFF AREAS

Alongside clinical settings, the LED Sky Panels work well in staff areas to create calm and restful spaces.

LED Sky panels are an excellent solution for areas without windows and natural light.

HUMAN CENTRIC LIGHTING

Additional human centric lighting options are available to allow patients and staff to control the temperature of the images displayed.

This system can also be automatically programmed to simulate the daily light cycle of dawn to dusk that regulate circadian rhythms, bringing about positive effects on comfort, health and to encourage recovery.
