VIBWIFE BIRTH MOBILITY SYSTEM

A mattress for the AVE 2 Birthing Bed that rocks and vibrates for a relaxing birthing experience.

The Vibwife has four movement settings to increase comfort during labour. These movements act similarly to typical massage techniques for muscle relief. Each movement pairs with positioning examples to maximise the Vibwife's movement features.

The movement settings include:

- Rocking Baby Positioning
- Sleeping Beauty Positioning
- Infinite Harmony Positioning
- Vibration & Jiggle Positioning

PATIENT CONTROL

The Vibwife's movement is controlled via remote control. By using the remote control, a birthing person accurately follows their birthing plan at their own pace, giving midwives additional time during labour to fulfil their duties.

CONFIGURATON OPTIONS

The Vibwife Birth Mobility System is designed to be used with the AVE 2 Birthing Bed. It can be purchased alongside the AVE 2 Birthing Bed or as a stand-alone mattress to be retrospectively fitted if you already have an AVE 2 Birthing Bed.

EASE OF CLEANING

The Vibwife and the AVE 2 Birthing Bed are compatible with hospital approved wipes and chlorine based cleaning solutions. The Vibwife is also fitted with protective waterfall flaps and welded seams to protect the mattress from fluid ingress.

BENEFITTING CAREGIVERS

The Vibwife's movement settings simulate Rebozo techniques and massages for you, reducing the physical strain on midwives during labour.

Using the remote control's screen, caregivers can instruct mothers to reposition, rather than lifting and moving the patient themselves.
